

Clean Set of Claims

1. A server adapted to provide broadcast information relevant to a locality to a plurality of localities, said server comprising:

a processor within said server;

a call related information and broadcast information stream relevant to a locality lookup table within said server accessible by said processor and associating call related information entries with respective broadcast information streams relevant to a locality;

a plurality of stored broadcast information streams within said server of current news relevant to a locality;

wherein said processor is adapted to identify a specific one of said plurality of stored broadcast information streams relevant to a locality for downloading a real-time audible representation of said one of said plurality of stored broadcast information streams relevant to a locality to a caller based only on call related information received with respect to an incoming call.
